Wake up your coffee!

Flavoured coffees are one of the fastest growing segments of the beverage market, but until now, they've been made with flavoured creamers or messy, space-consuming bottles of syrup.

Introducinga major innovation – the Flavor Shot Series.... *the single best way to include flavoured coffee in your beverage service.*

Offers variety.

The FlavorShot Series dispenses a variety of flavours right into the coffee cup. Select from **French Vanilla, Butter Pecan, Mocha, Caramel** and more.

FlavorShot holds 8 flavours—and up to 3 flavours can be combined in a single shot. A “**Stoke**” button is provided for those needing an **extra caffeine** hit.

Easy to use.

There are no special hook-ups or water lines required. Simply place the product bags into the totally enclosed system, plug in, and you're ready to go. At the push of a button, FlavorShot automatically dispenses 1ml of the selected flavour/s into your cup.

Eliminates waste.

The FlavorShot Series eliminates both pilferage and waste. There are no creamer cups to take, and with precise delivery of the syrup from the nozzle, customers receive only what they need.

Saves space.

There's also no wasted counter space. The average flavoured creamer or syrup rack uses close to 60cm of space. The Flavor Shot Series measures a compact 47 x 14 x 51cm.

Cleaner.

The FlavorShot Series meets all Board of Health Regulations. It's **easy to clean** and there is no sticky residue on counters.

Makes money.

Start saving money right away. The bag-in-a-box refills cost less per gram than any other flavoured syrup or creamer pack currently available.

FlavorShot Unit Specifications

Single Port Model
Model: FS1 Single
Height: 51cm
Width: 14cm
Depth: 47cm

It's all in the Delivery...

Naturally!
