

Maxi Banner Suspension System

The **Bannerlift™ Maxi Banner Suspension System** is a fabulous new system designed for raising large advertising banners in high atriums such as those found in shopping centres, malls and galleries. Using the **Bannerlift™ Maxi Banner Suspension System** banners can be changed in around **5 minutes** by **just one** person!

This is a fantastic saving of time, personnel and cost!

With **Bannerlift™ Maxi Banner Suspension System** the banner is lowered by a hand-held remote control. The banner is unclipped from the banner holder rail and the new banner is clipped in. The remote control is used to raise the banner up to the desired height.

- Designed to hold banners weighing up to 20 kg from 5 to 30 metres from the floor.
- Has safety brake to prevent banners free falling.
- Improves Safety - Cranes & Riggers not required.
- Reduces Cost - Only requires one operator.
- Operated by hand held remote control unit.
- Saves Time - Banners changed in minutes.
- Designed by **Bannerlift™** & manufactured in Australia
- Custom made to suit banners up to 3 m wide.
- Supplied with fixing brackets and banner rails.
- (in some unique applications extra fitting components may be required.)
- Banners can be made of paper, plasticised paper, mesh or vinyl and are not included.
